

THE ENERGY CLUB OF WESTERN AUSTRALIA

Western Australia's premier
industry network and education
resource for the energy sector.

The Energy Club of Western Australia

The Energy Club WA (ECWA) hosts monthly events such as industry dinners with keynote speakers, sundowners, plus the annual gala and golf day functions.

We also facilitate the promotion of industry careers to students years 8-10 through our Next Generation Schools Program and support new entrants to the industry with Introduction to Energy Industry Seminars.

We value the role we play in connecting people within the energy industry, connecting the “Next Generation” to inspire their career pathways, and connecting people to promote knowledge sharing amongst their peers.

OUR VISION

To be a prominent organisation providing professional events for the opportunity of forming relationships and meaningful connections that support, enrich and inspire both professionally and personally.

Our commitment to our members is to provide a professional platform in which they can enjoy being part of a group of informed industry representatives, mixing both professionally and socially, facilitating long term associations, procuring new business opportunities, as well as presenting opportunities for career development and collaboration.

MEMBERSHIP

Connecting people with energy!

The Energy Club WA is an industry network and educational resource for the energy sector in Western Australia.

We are a member-based not-for-profit organisation comprising of members from all areas of the industry and associated service providers.

We create an environment where members can mix both professionally and socially in order to facilitate long term associations and business opportunities, and an arena for promoting continued professional development, education and public awareness.

Membership is open to individuals directly engaged, or vitally related to the Energy industry.

FEES AND PAYMENTS:

Standard Annual Membership:	\$175.00
Once-off Registration & Badge Fee:	\$50.00
Young Professional Annual Membership: (eligibility - 35 years of age and under)	\$100.00

*All membership fees apply from 01 July to 30 June. If joining mid-year, a pro-rated rate is tailored for the remaining months of the financial year.

Energy Club WA (formerly Petroleum Club of WA) has maintained for the last 56 years its membership comprising hundreds of professionals from all facets of the industry – from explorers to environmentalists, engineers to recruitment specialists; leaders, decision-makers, government representatives, contractors and suppliers to the industry – all with the common goal of sustainable development of Australia's energy resources.

 - Public House Kitchen and Bar
 - Snap Fitness Perth CBD
 - Auto Classic – BMW Corporate
 - Business News
 - Milano Menswear

YOUNG PROFESSIONALS

In February 2018, the Energy Club WA (formerly Petroleum Club of Western Australia) formed the Energy Club Young Professionals (ECYP).

The Energy Club Young Professionals aims to provide a platform for students, graduates and individuals who are directly engaged, or vitally related to the energy industry, to connect and build on their networks and achieve personal development objectives through tailored mentoring with established members of the energy community.

The ECYP is open to anyone under the age of 35; graduates and students are encouraged to apply.

THE BROOKE ARNOT EXCELLENCE AWARD

The Brooke Arnot Excellence Award, named in honor of our colleague and friend, Brooke Arnot, was developed to recognise the outstanding work of young professionals, within our industry.

Whether it be at work, outside of work, or volunteer work, if you know a Young Professional who goes above and beyond, exceeds expectations and continually strives for excellence, then we encourage you to nominate this person.

Eligibility: Nominees must be an active member of Energy Club WA, under the age of 35 yrs.

LEADERSHIP AND MENTOR PROGRAM

Enabling future leaders

Our six month program is designed to drive rich learning and development for both mentor and mentee. Our framework will encourage you to share knowledge, skills and life experience to guide one another to reach their full potential.

Key Outcomes: Define your values, create a career vision, build your road map and reverse mentoring.

INDUSTRY NETWORKING EVENTS

Energy Club WA holds regular industry networking events with high profile keynote speakers, covering topics such as project updates, innovation, technology, leadership, market analysis, best practice, efficiencies and collaboration.

Our recent focus has been to provide more member exclusive events and programs, as well as collaborations with industry-related associations to enable our members to broaden their network.

ONLINE EVENTS

Like everyone, we had to make some significant changes to our operations over recent months. We've heard from some fantastic presenters through our virtual event series' and these have been complimentary for all Energy Club WA members.

The online 'lunch and learn' events and activities will remain part of our event calendar moving forward. Keep an eye out for these announcements throughout the year.

LIVE EVENTS

We're thrilled to be able to have our industry dinner's, social and networking events returning to the calendar, and have an exciting few months ahead. Keep up to date, visit our website for more details.

Sundowner events provide a valuable opportunity to meet with like-minded professionals in an informal setting, get to know the Energy Club WA team, board and enjoy drinks and canapés at many of Perth's unique venues.

ANNUAL INDUSTRY BALL

SATURDAY 29TH JULY 2023

The Energy Club WA and the Society of Petroleum Engineers WA are pleased to present the Industry Gala Ball.

This event is the most prestigious event on the energy industry calendar; an evening of elegance, fabulous food and wine, and dazzling entertainment.

The Annual Ball is a premier event on the industry's social calendar and is well attended by a diverse range of energy professionals.

The evening is focused at celebrating our industry as a whole and acknowledges the exciting milestones that have been achieved throughout the year.

This year SPE WA is turning 40, and we're celebrating by going back to the 80's! Time to tease your hair, dust off your prom dress, and gather all your brightest accessories.

ANNUAL GOLF DAY

THURSDAY 2ND NOVEMBER 2023

Whether it be rewarding your staff or impressing clients, the annual golf day is just the ticket, and suitable for all abilities.

This is always great day and sell out event, perfect for team building and networking opportunities.

The competition for the day is the Ambrose Team Event. Teams are made up of 4 players; we accept both team and individual bookings.

The networking continues after the game with dinner and trophy presentations in the Clubhouse.

There are always fantastic prizes up for grabs, including the \$10,000 hole-in-one competition.

EDUCATION

Connecting the “Next Generation” to careers in the Energy Industry

The Next Generation Schools Program is a community engagement initiative that has been facilitated by the Energy Club of Western Australia since 1991.

The Program consists of 4 visits to introduce students years 8-10 to the energy industry in a fun, interactive and educational environment.

During each mentor visit, students learn about the positive impacts the energy industry has on society, meet with industry professionals and participate in various interactive experiments.

The program culminates in the Student Expo Day, held in November at ECU Joondalup, where students are invited to visit interactive displays and generate points through completion of industry related activities, games and quizzes. The aim is to generate interest and facilitate the question and answer process between students and industry representatives.

Enquire about participating: education@energyclubwa.org.au

The Introduction to Energy Industry Seminar

This one-day seminar is designed for those who wish to gain a broad understanding of the energy industry at an introductory level.

Delivered by industry professionals and experts in their fields; the core topics cover upstream oil and gas, with pointers to our future energy industry.

Recommended for people who supply services to the energy industry (finance, law, engineering etc), administration staff, students, new employees or those looking for employment.
